© 2014 Sears Hometown and Outlet Stores, Inc.

Details:

1. URL for this page should be: <http://www.searshardwarestores.com/locations/store-list>
2. There will be an alphabetical list of states at the top. Clicking on a state will scroll the enduser to that state's section on the page, via a name anchor tag. **The whole page will scroll, and not just the middle-section, to maintain the integrity of the responsive code.** For instance, clicking "Illinois" will scroll the user to the Illinois section - <http://www.searshardwarestores.com/locations/store-list#ILLINOIS>. Only states where the format's stores exist will appear. This page will include every store in the format (alphabetically).
3. Each state section will have the state name in bold **CAPS** above its store(s)
4. **There should be a noticeable section break between each state section**
5. Each store on this page will have the following listing structure:

1st and 2nd lines (will link to store homepage without spawning a new window or tab):
`<#>. <format> - <city>. <st>`
 3rd line: `<street address>`
 4th line: `<city>. <st> <zip>`
 5th line: Phone: `<phone>`
 6th line: (blank line)
 7th line: **Hours of Operation:**
 8th line: Mon-Sat: `<open>` - `<close>`
 9th line: Sun: `<open>` - `<close>`

Example:

1. [Sears Appliance & Hardware Store - Downers Grove, IL](#)
925 Ogden Ave.
Downers Grove, IL 60515
Phone: 630-241-4545

Hours of Operation:
Mon-Sat: 8:00 am - 9:00 pm
Sun: 9:00 am - 6:00 pm

- Indicates that there should be more sections below

Questions:

1. What should the matrix be (how many columns)?
2. Font face/size for store listings?
3. Link for each store: Can we force it to be on two lines, as shown?
