Description

© 2013 Leadrueh LTD.

If user wants to upload a different picture, they should click on "Choose file" to get the new one. File name should be displayed and not actual image. Should allow for JPG, PNG, GIF

On the Personal page, there is a form for end-user to fill out. HTML code will go here

See LRS software for links.

Validate email

Allow them to put up to 20 characters

Clicking this pushes all changes live to the Personal page

Headline and Sub-Headline should have a character limit so that the text doesn't run out of boundaries on actual page.

Description should have character limit so that the text doesn't run out of boundaries on actual page.

Description should have character limit so that the text doesn't run out of boundaries on actual page.

Description should have character limit so that the text doesn't run out of boundaries on actual page.

You'll notice that this is very stripped down from what you originally had. We're not going to have left nav or top nav; no preview/publish; no site live (yes/no); no choosing which social media icons to display (and they should not be hot).
